

The prolonging of the implementation duration of the project – Results

Following the approval granted by the Director Council of FRDS, the implementation duration of the project has been prolonged until 31.10.2016. Thus, there have been performed additional activities financed within the plus facility.

The non-formal activities, through which the relational and communication skills of students improve, encourage creativity and free speech; workshops have been organised: painting, dancing, music, theatre and there were public people, as mentors, from respective fields.

The interactive platform learningspark.ro is a base of video interactive lessons, whose beneficiaries – the 250 students from the five involved scholar units from Prahova – use it with a view to obtaining scientific (mathematics, physics and chemistry) and digital skills, by using the system.

The products realised throughout the workshops have been presented in an exposition that had a charitable sale. At the end of the project, there has been organised a “Young talents festival”, which was prepared during the workshops.

Through the proposed additional activities the change came from each person’s within. The teamwork – students, parents and teacher – has resulted in very good results, even though the students come from less favourable backgrounds.
